Reasons for allowance

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to data processing apparatus and method, and data reading and recording apparatus incorporated in a watermark embedding system for embedding digital watermark information in information signals for the purpose of copyright protection. Independent claim 1 identifies the uniquely distinct features "a measurement unit operable to measure the time that said second processor has performed the second process and to determine a predetermined processing time from a processing record; and a controller operable to terminate operation of said second processor when the measured time equals the predetermined processing time". The closest prior art, Ryan (US Pat. No. 6,374,036) and Inoue et al. (US Pat. No. 5,889,919) discloses a recording method, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
